

# FRONT END LOADER

## RIIMPO321F: - Conduct Civil Construction Wheeled Front End Loader Operations

### Course Overview

This unit describes the skills and knowledge required to conduct wheeled front-end loader operations.

This unit applies to those working in site- based roles.

Where equipment being assessed requires the fitting and removal of attachments to be demonstrated an integrated tool carrier unit should be used.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

### Course Content

- plan and prepare for wheeled front end loader operations
- operate front end loader in line with established requirements
- attach, secure, lift carry and place materials
- prepare to relocate the front end loader
- conduct housekeeping activities

### Course Outcome

On successful completion of this course students will be issued with a statement of attainment

### Course Prerequisites

- ability to identify, interpret information from workplace procedures
- numeracy skills
